

## Making Sandwiches

Hassan is hungry and he wants to make a sandwich.

This is what he finds in the kitchen:

- \*white bread
- \*wholewheat bread
  
- \*ham
- \*peanut butter
- \*jam
- \*tuna
- \*lettuce

How many different sandwiches could Hassan make altogether?

Of course, you might not like to eat some of them. (Have you ever tried a lettuce and jam sandwich?)

So ... how many could Hassan make that you would like to eat?
