

2.3. Changing the Font Face

These fonts may be installed on your computer:

ALGERIAN
 arial
bahaus 93
 book antique
 bradley hand ITC
 centaur
 chiller
 comic sans ms
 Harrington
impact
lucida calligraphy
 times new roman

REMEMBER:

1. "Times New Roman" is the default font chosen by the computer if it does not recognise the face you have chosen.
 will choose this one if it does not have the one you chose ... or if you made ANY coding or spelling error
2. Different fonts ARE different sizes

<HTML> <BODY>	
	Opening heading font tag
Do a larger font for a heading	Most web pages have large writing for a heading
	Closing heading font tag
	Opening main part font tag
Do a different and smaller font for the body	
	Closing main part font tag
</BODY> </HTML>	

NOW YOU TRY:

OPEN Notepad,

USE the font tag to change the FACE and SIZE of your font TWICE

-ONCE for a heading

-However many times you like for a main part
