

Testing Insulators

Material	Starting Temperature	Ending Temperature
1.		
2.		
3.		

- What was the starting temperature for material 1?

- What was the starting temperature for material 2?

- What was the temperature for material 1 at the end of the experiment?

- What was the temperature for material 2 at the end of the experiment?

- Which material made the temperature change the least?

- Which material made the temperature change the most?
